Reasons for Allowance

3. **Claim 1** recites the limitation *"wherein the investigating the field of the block allocation table comprises writing a state value of "1" in the field of the block allocation table if the state value has been "0," and detecting that the logical block number has been searched for through the previous physical block during the scanning process, if the state value is "1."*
4. **Claim 11** recites the limitation *"writing a state value of "1" in the field of the block allocation table if the state value has been "0," and detecting that the logical block number has been searched for through the previous physical block during the scanning process, if the state value is "1."*
5. **Claim 22** recites the limitation *"changing a scanning identifier for the determined last accessed logic block to a first identifier in a block allocation table, if the scanning identifier of the determined last accessed logic block is different from the first identifier."*

6. Said limitations are taught by the specification as originally filed at least at paragraph 48. Said limitations, as argued by applicant in the third paragraph beginning on page 9 of the remarks submitted 9/11/2009, in combination with the other recited limitations of claims 1, 11, and 22, are not taught or suggested by the prior art of record.
7. **Claims 2-4, 8-10, 12-14, 17, and 23-25** depend from claims 1, 11, and 22, respectively, and are considered allowable for at least the same reasons as claims 1, 11, and 22.
